

Elastomer Type: Nitrile (NBR)

Precix Compound: M31 / 70 Shore A

General Information

- Resistant to Petroleum Hydraulic Fluids
- Excellent Low Temperature flexibility to -55°C
- Good Compression Set resistance
- Good Heat Resistance to 121°C

Applications

- Hydraulic Systems
- Aeronautical & Aerospace Applications

Material

- 100% Virgin Materials
- Made in USA
- QPL Listed to Mil-PRF-25732E

Color

- Black

Operating Temperature

- -55°C to +121°C

Specific Gravity

- 1.28
