

Elastomer Type: Fluorocarbon (FKM)

Precix Compound: F90 / 90 Shore A

General Information

- Excellent Heat Resistance
- Excellent Resistance to Engine Oils & Lubricants
- Low Compression Set
- Excellent Ozone & Weathering Resistance

Applications

- Engine Oil Seals & Gaskets
- Standard Fuel System Components
- Petrochemical Handling Systems
- High Temperature Seals & Gaskets

Material

- 100% Virgin Materials
- Made in USA
- Copolymer FKM
- Listed on the QPL for Aerospace Specifications AMS 7259

Color

- Black

Operating Temperature

- -22°C to +250°C

Specific Gravity

- 1.85
