

COMMITTED TO A SAFE WORKPLACE AND A CLEAN WORLD

To ensure the sustainability of our employees, company, and community, Precix® is committed to develop and maintain management systems that integrate sound business practices with environmental, safety, health, and quality objectives. These objectives will be reviewed and updated periodically.

The Massachusetts Department of Environmental Protection Toxic Use Reduction Program Regulations 310 CMR 50.43(1) requires facilities to develop a management policy regarding toxics use reduction. This policy shall include, but not be limited to, a description of the ways in which the facility encourages toxics use reduction.

To satisfy the requirements of 310 CMR 50.43(1), Precix, Inc. has developed and implemented the following environmental policy:

- Precix® will strive for continual improvement in all activities with focus on life cycle analysis, toxic use reduction techniques, and prevention of pollution.
- Source reduction methods will be employed as a first choice.
- Precix® will work with governmental and non-governmental agencies including vendors, research organizations, the local community, and customers to improve product and processes to reduce their environmental, safety, and health impact.
- Precix® will promote responsible and accurate statements of its product while avoiding false or misleading claims of quality, safety, health, or environmental benefits.
- An annual report will be prepared listing the status of our activities and the performance of our environmental programs.
- Precix® will comply with all federal, state and city regulations as well as voluntary commitments required under ISO 14001.

Quality Policy

Precix®

Success Demands Precision

Quality Policy Key Points

- Understanding our customers' needs.
- Continually improving & adapting to rapidly changing requirements.
- Committing our skills, knowledge & resources to our customers' success.

Precix is focused on integrating our people, processes and products seamlessly with our customers so that Precix becomes a vital and natural extension of their business.

Quality goals

- Continuous improvement of products and performance.
- 100% Quality Product / Delivered on-time.
- Effective process management to ensure design manufacturability.
- Overall excellence in customer service and satisfaction.
- Maintain the infrastructure & work environment to ensure conformity to requirements.

We recognize that integrity is another vital ingredient to success in developing and sustaining productive long-term partnerships throughout the supply chain. Precix pledges to communicate and deal openly, honestly and respectfully with all our partners and employees.

Precix is a business partner that is precise in focus, process, product and production which is essential to be successful in today's highly competitive global marketplace.
